Ig gamma-2b chain precursor - mouse
C;Species: Mus musculus (house mouse)
C;Species: Nus musculus (house mouse)
C;Date: 30-Sep-1989 #sequence_revision 30-Sep-1989 #text_change 23-Jul-1999
C;Accession: S01321
R;de Waele, P:, Feys, V:, van de Voorde, A:, Molemans, F:, Fiers, W.
Rur: J. Biochem. 176, 287-295, 1988
A;Title: Expression in non-lymphoid cells of mouse recombinant immunoglobulin directed a A;Reference number: S01320; MUID:88329081; PMID:3138116
A;Accession: S01321
A;Molecule type: mRNA
A;Residues: 1-475 <DE1>
A;Cross-references: EMBL:X13188; NID:g51780; PIDN:CAA31580.1; PID:g51781
A;Note: this sequence was determined from the differentiated gene
C;Superfamily: immunoglobulin C region; immunoglobulin homology
C;Keywords: Immunoglobulin C region; immunoglobulin homology
F;1-19/Domain: signal sequence #status predicted <MAT>
F;1-59-223/Domain: immunoglobulin homology <IMM>

                                                                                                                                                                                                                                                                                                           A; Molecule type: mRNA
A; Residues: 1-458 «BER»
C; Complex: An immunoglobulin heterotetramer subunit consists of two identical light (kap hain disulfide bonds. In some cases, such as IgA and IgM, the subunits associate into la C; Superfamily: immunoglobulin C region; immunoglobulin homology
C; Keywords: alternative splicing; duplication; glycoprotein; heterotetramer; immunoglobulin pomology F; 21-92/Domain: immunoglobulin homology 
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     A;Title: Complete sequence of a cloned cDNA encoding rabbit A;Reference number: A02164; MUID:84088930; PMID:6418803 A;Contents: a2 allotype A;Accession: A02164
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     밁
